Plovák 60x40x61 Y-bom černý

SKU: PL604061PEBLAYbom

Cena s DPH: 461,25 PLN

Cena bez DPH: 375,00 PLN

Technická špecifikácia

Attribute	Value
Rozmer	60 x 40 x 61 cm
Farba	Čierna
Materiál	Polyetylén (PE)
Hmotnosť	6 kg
Doba dodania	3-7 dní

Popis

Y-BOM Float 60x40x60 cm black– Professional Float for Floating Docks and Marinas

The Y-BOM float 60x40x60 cm is a professional solution designed for the construction of floating docking arms, also known as Y-boms. The float is manufactured from high-quality **polyethylene using advanced rotomoulding technology**, ensuring excellent durability, full tightness, and resistance to harsh marine conditions.

Thanks to this production method, the float offers long service life, high mechanical strength, and resistance to UV radiation, saltwater, temperature fluctuations, and mechanical impacts. It is an ideal choice for modern marinas, floating docks, yacht harbours, and professional waterfront infrastructure projects.

Technical Specifications

- manufacturing technology: rotomoulding
- material: high-density polyethylene (HDPE)
- dimensions: **60 x 40 x 60 cm**
- buoyancy: approx. **150 litres per float**
- integrated mounting points: **4 embedded M10 nuts**
- nut spacing: **10 x 15 cm**
- standard colour: black
- custom colour available for orders above 20 units

Key Benefits

The slim and compact shape of the float allows **efficient use of space alongside the main dock**, which is especially important in marinas with limited water area. Depending on structural requirements, multiple floats can be combined to achieve higher buoyancy and enhanced stability of the Y-bom structure.

The integrated M10 mounting nuts ensure **fast, secure, and precise installation**, reducing assembly time and increasing overall construction reliability. The product offers an **excellent price-to-quality ratio**, making it a cost-effective solution for both large-scale investments and individual projects.

Applications and Use Cases

This Y-BOM float is commonly used in:

- floating dock finger pontoons (Y-boms)
- marinas and yacht harbours
- floating piers and walkways
- modular floating dock systems
- commercial and recreational waterfront facilities

Additional Possible Applications

1. Floating technical platforms
2. Support elements for floating gangways
3. Water sports infrastructure
4. Aquaculture and fish farming installations
5. Temporary floating work platforms

The product is covered by a **manufacturer’s warranty** and made exclusively from **top-quality materials**. We ensure **fast order processing and delivery**, with most products shipped directly from our warehouse.

Manufacturer – Sorfan

Sorfan is a well-established manufacturer and distributor of specialised floating solutions. For many years, we have focused on the production of floats for floating docks, pipeline floats, and Y-BOM systems. We offer **the widest range of floats and one of the largest selections in Europe**.

Our brand is recognised and trusted on the market. We serve both wholesale and retail customers and supply products to multiple European countries. Sorfan operates professionally across several European markets, ensuring reliable quality and consistent availability.
