Float 60x40x61 Y-bom blue + 4 stainless steel threads

SKU: PL604061PEBLUYbom Inox

Gross Price: PLN 553.50

Net Price: PLN 450.00

Technical Specification

Attribute	Value
Displacement	110 l
Dimension	60 x 40 x 61 cm
Color	Blue
Material	Polyethylene (PE)
Weight	6 kg
usable floor area	20x40x mc
Shipping time	7-14 days
Production time of 100 pcs	12 days

Description

The Y-BOM float 60x40x60 cm with **embedded stainless steel M10 inserts** is a premium solution designed for floating dock fingers exposed to demanding marine conditions. Manufactured from high-quality polyethylene using **rotomoulding technology**, the float offers uniform wall thickness, excellent tightness, and long-term structural stability.

The key distinguishing feature of this model is the use of **stainless steel threaded inserts**, which provide superior resistance to corrosion, moisture, and saltwater. This makes the float especially suitable for marinas, coastal installations, and projects requiring long service life with minimal maintenance.

Technical data: dimensions 60×40×60 cm, buoyancy approx. 150 litres per unit, 4 stainless steel M10 inserts with 10×15 cm spacing, standard blue colour, custom colours available for orders over 20 units.

The slim shape allows efficient use of dock space, while multiple floats can be combined to increase buoyancy. The product is covered by a warranty, made from top-quality materials, and offers an excellent price-to-performance ratio. Fast delivery is ensured from stock.

The manufacturer, **Sorfan**, is a recognised European producer of floats for floating docks, pipelines and Y-BOM systems, supplying both wholesale and retail customers across multiple countries.
