Platform float (green)

SKU: PL105042PEGRE

Gross Price: PLN 615.00

Net Price: PLN 500.00

Technical Specification

Attribute	Value
Displacement	200 l
Dimension	100 x 50 x 42 cm
Color	Green
Material	Polyethylene (PE)
Weight	15 kg
Shipping time	3-7 days
Production time of 100 pcs	8 days

Description

The design and properties of the displacement float enable quick assembly of the floating deck skeleton structure. Our float is made of polyethylene, with rotational molding technology. The float can be filled with polystyrene so that if the float is punctured, it retains its properties.

Thanks to the material from which our buoyancy float is made, it is completely resistant to environmental factors, impacts and UV radiation. Polyethylene is also characterized by flexibility and low own weight. Our product is a good investment, as in the event of damage, it can be repaired by welding.

The float weighs approx. 15 kg

Dimensions: L / W / H: 100/50/42

The wall thickness of the float is 4 mm.

The float capacity is approx. 200 kg.
