Technical Specification

Attribute	Value
Dimension	217 x 116 cm
Color	Grey
Material	Polyethylene (PE)
Weight	85 kg
Shipping time	3-7 days

Description

WASSERTANK 2000 L

The **WASSERTANK 2000 L rainwater tank** is designed for efficient above-ground storage and retention of large volumes of rainwater collected from roof surfaces via gutter systems. Its high capacity makes it ideal for large gardens, commercial facilities, agricultural operations and industrial applications with increased water demand.

The tank is manufactured from premium **polyethylene (PE)**, ensuring excellent resistance to UV radiation, weather conditions and mechanical stress. Its stable free-standing construction allows **above-ground installation only**, eliminating excavation work while ensuring safety and long-term durability.

Technical specifications:

- capacity: 2000 litres
- diameter: 1160 mm
- material: polyethylene
- colour: grey
- outlet tap: 400 mm
- top opening with lid and transport handles

Using the WASSERTANK 2000 L significantly reduces potable water consumption, supports sustainable rainwater management and lowers operating costs. The product complies with current **EU rainwater retention recommendations**, making it a future-proof solution for modern infrastructure.

Applications: large-scale irrigation, automated watering systems, vehicle and equipment washing, utility water storage, maintenance tasks.
Additional uses: greenhouses, ponds, agriculture, emergency water reserve, recreational facilities.

We are an experienced manufacturer and distributor of rainwater management systems, hydrotransport solutions and floating structures. We offer one of the widest product portfolios in Europe, fast delivery from stock, warranty coverage and **custom-made solutions**.
