Description

Sorfan Shore-to-Dock Gangway for Modular Floating Pontoons – safer access, better comfort

A reliable shore entry is one of the most important parts of any modular floating dock system. The Sorfan shore-to-dock gangway is designed to create a stable, comfortable connection between the shoreline and a modular floating dock, improving both user experience and operational safety. It works perfectly for private lakeside properties as well as professional facilities such as marinas, water sports centers, rental bases, and recreational areas.

Key specifications

- **Dimensions:** 200 cm length, 110 cm width
- **Structure:** galvanized steel – strong load-bearing performance and excellent corrosion resistance
- **Walking surface:** composite decking – durable, user-friendly, stable underfoot, and easy to clean
- **Dock compatibility:** engineered for modular docks with **25 cm** and **50 cm** height
- **Mounting kit included:** the price includes all essential connection elements to attach the gangway to the dock
- **Custom sizes available:** we can produce a different gangway size on request

Benefits – what does this gangway deliver?

- Safer, more controlled access from shore to dock, helping reduce slip risks.
- Greater convenience for families, seniors, and users who prefer a wide, stable walkway.

- A more professional finish for your dock infrastructure, improving the look and perceived quality of the entire site.

- Faster installation and fewer surprises thanks to included connectors and compatibility with common dock heights.

Intended use and recommended safety practices
In many public and commercial waterfront settings, safe pedestrian circulation is part of standard facility management and health & safety routines. A dedicated entry gangway supports organized movement near water and helps operators meet expected safety practices for recreational infrastructure.

Typical applications and use scenarios

- Access from shore to a modular dock at a private lake house

- Gangway entry for marina pontoons and berthing areas

- Connection to floating bathing platforms and leisure zones

- Shore access to service docks on retention ponds or reservoirs

- Controlled entry to floating event platforms

5 additional ways to use the product

1. Entry to a floating fishing platform for safer and easier access.

2. Access to a floating observation deck or sightseeing point.

3. Approach to a lifeguard or supervision station on water.

4. Entry to floating measurement/monitoring platforms on reservoirs.

5. Controlled access to technical pontoons used in aquaculture or industrial water sites.

Quality, warranty, and fast delivery

This Sorfan gangway is built from premium materials to ensure long service life. You get an attractive price-to-quality ratio, a product covered by **warranty**, and fast order processing—most items are shipped directly from our warehouse.

Why choose Sorfan

For many years, our company has specialized in manufacturing and distributing professional products for floating dock construction. We offer the widest range in our country and one of the largest selections in Europe for pipeline floats, dock floats, and Y-bom floats. Sorfan is a well-known and trusted brand on the market. We supply both wholesale and retail customers across multiple European countries, with a large portion of orders dispatched straight from stock.
